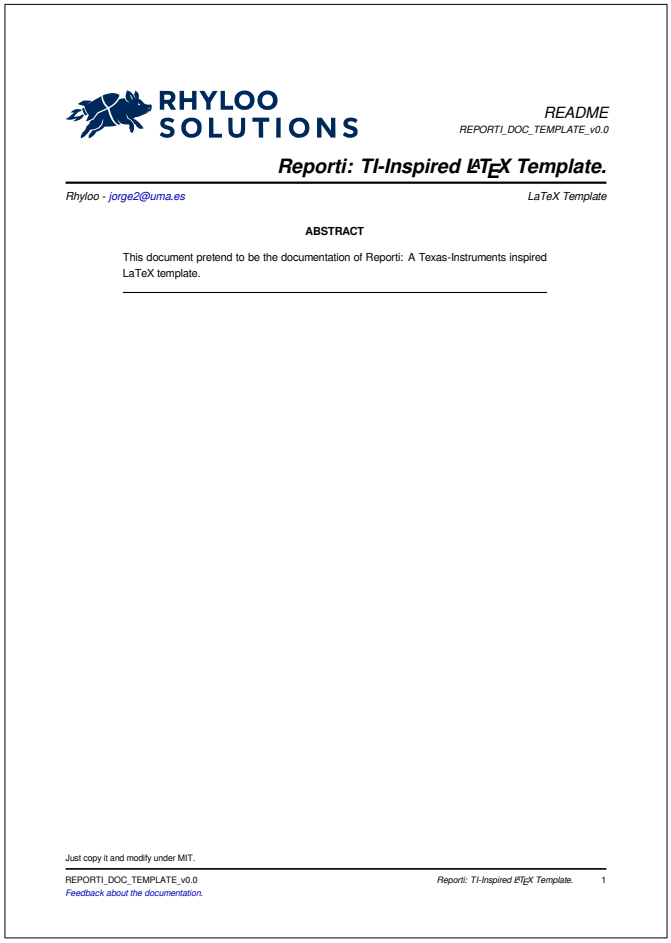
1. Motivation

At college I read lot of documents about electronics. One of my favorites was *Op Amps for everyone* from Texas Instruments (TI). If you take a moment to analyse the documents in the `TI_Examples` folder from this repository, you will agree with me that they are really well done, with great content and a nice design. So, after some time, I found free time to write a LaTeX template. To be honest with you, I don't use LaTeX where I work, and I am not sure if it's used anywhere else, but maybe I or future generations will have to write good nice reports or notes for some crazy school project. :D

So, here is the first version of Reporti, a Texas Instruments-inspired LaTeX template for you all.



RHYLOO SOLUTIONS

README
REPORTI_DOC_TEMPLATE_v0.0

Reporti: TI-Inspired LaTeX Template.

Rhyloo - jorge2@uma.es — LaTeX Template

ABSTRACT

This document pretend to be the documentation of Reporti: A Texas-Instruments inspired LaTeX template.

Just copy it and modify under MIT.

REPORTI_DOC_TEMPLATE_v0.0 — Reporti: TI-Inspired LaTeX Template. 1
Feedback about the documentation.

2. How to use

2.1. Linux system

Include template on system - If you are planning to use this template with LaTeX with linux download `reporti.csl` and put it in the path ....

```
find -L /home -samefile ./../Reporti/reporti.cls #
```

home/rhyloo/Documents/LaTeX/Reporti/reporti.cls /home/rhyloo/texmf/tex/latex/local/reporti.cls /home/rhyloo.emacs.d/reporti.cls /home/rhyloo/snap/languagetool/45/Documents/LaTeX/Reporti/reporti.cls /home/rhyloo/snap/languagetool/current/Documents/LaTeX/Reporti/reporti.cls

3. Features

3.1. Cover page

Just trying to keep it simple. A .cls file based on report class.

About features, the cover can be customize with the next commands: Check

```
\documentclass[draft]{reporti}  %
\cover[width=1.35\textwidth][continue]
\type{Name of doc type}
\code{Project Number/Code} % For more info. Look for naming conventions
\titulo{Project title}
\autor{Author}
\subtitulo{Subtitle}
\resumen{Summary}
\notes{Some notes in Cover}
\contact{Contact footnote}
```

Code 3-1: Control commands for the template

```
\documentclass[draft]{reporti}  %
```

Code 3-2: Control commands for the template

```
\documentclass[draft]{reporti}  %
```

Code 3-3: Control commands for the template

```
\documentclass[draft]{reporti}  %
```

Code 3-4: Control commands for the template

```
\documentclass[draft]{reporti}  %

4. About images

The file `Logo-EII-horizontal.pdf` doesn't have any type of LICENSE on the web. As master's student I can use, maybe you don't, be careful with it.

I am really interested in naming conventions applied to projects. I think is the first part of a good story, I define two names the first is common use and the second is like a code, i.e Fat-Man is the bomb, but if I said Fat-Man-DOC-123HAJK123

Do you have one for owns?? Explain in comments and discuss the best :D

Examples:

- Texas Instruments have names like: TAS5518-5261K2EVM. According to Deepseek
  - TAS: Indicates a Texas Instruments Audio Solution
  - 5518: The specific model number of the IC.
  - 5261: A code unique to the EVM design
  - K2: Likely denotes a revision or variant of the EVM
  - EVM: Standard suffix for Evaluation Module

IMO is the first part of a good story like ”MarkII” or ”Apollo”

5. About document class

```
\NeedsTeXFormat{LaTeX2e}
\ProvidesClass{reporti}[Template LaTeX based on Texas Instruments note application documentation.]
\LoadClass[10pt, a4paper, twoside]{article}

\DeclareOption{draft}{
    \PassOptionsToPackage{draft}{graphicx}
    \AtEndOfClass{\usepackage{draftwatermark}\SetWatermarkText{DRAFT}}
}

\newcommand{\@mylang}{english}
% Language options
\DeclareOption{spanish}{\renewcommand{\@mylang}{spanish}}
\DeclareOption{english}{\renewcommand{\@mylang}{english}}

\DeclareOption*{\PassOptionsToClass{\CurrentOption}{article}}
\ProcessOptions\relax
```

5.1. Packages

I added package geometry becuase I need to config headheight, and page geometry:

```
\RequirePackage{geometry}      % Configuración de márgenes
\setlength{\headheight}{50pt} % 32.05278pt mínimo requerido + margen de seguridad
\geometry{top=3cm, bottom=2.5cm, left=1.83cm, right=1.83cm, footskip=1.2cm}
```

Encabezados/pies de página. I defined two styles.

1. mainstyle: Used for full document elaboration
2. tocstyle: Used by tocs.

```
\RequirePackage{fancyhdr}

\fancypagestyle{mainstyle}{
  \fancyhf{}
  \renewcommand{\headrulewidth}{2pt}
  \renewcommand{\footrulewidth}{1.5pt}
  \ifdefvoid{\@logo}{}{%
    \fancyhead[RE,LO]{\includegraphics[height=2em]{\@logo}\par
      \href{www.rhyloo.com}{www.rhyloo.com}\par\par}
    }
  \fancyhead[LE,RO]{\nouppercase{\rightmark}}
  \fancyfoot[LE]{{\fontsize{8}{35}\selectfont \thepage \hspace{0.8cm} \itshape\@title}}
  \ifdefvoid{\@contact}{\fancyfoot[RE,LO]{{\fontsize{8}{35}\selectfont \ifdefvoid{\@projectcode}{}{\@pro
```

```
    \fancyfoot[RE,LO]{{\fontsize{8}{35}\selectfont \ifdefvoid{\@projectcode}{}{\@projectcode}\\\itshape\
    }
  \fancyfoot[RO]{{\fontsize{8}{35}\selectfont  \itshape\@title \hspace{0.8cm} \thepage}}
}

\fancypagestyle{plain}{
  \fancyhf{}
  \renewcommand{\headrulewidth}{2pt}
  \renewcommand{\footrulewidth}{1.5pt}
  \ifdefvoid{\@logo}{}{%
    \fancyhead[RE,LO]{\includegraphics[height=2em]{\@logo}\par
      \href{www.rhyloo.com}{www.rhyloo.com}\par\par}
    }
  \fancyhead[LE,RO]{\nouppercase{\rightmark}}
  \fancyfoot[LE]{{\fontsize{8}{35}\selectfont \thepage \hspace{0.8cm} \itshape\@title}}
  \ifdefvoid{\@contact}{\fancyfoot[RE,LO]{{\fontsize{8}{35}\selectfont \ifdefvoid{\@projectcode}{}{\@pro
    \fancyfoot[RE,LO]{{\fontsize{8}{35}\selectfont \ifdefvoid{\@projectcode}{}{\@projectcode}\\\itshape\
    }
  \fancyfoot[RO]{{\fontsize{8}{35}\selectfont  \itshape\@title \hspace{0.8cm} \thepage}}
}
